

2030 CAMPUS MASTER PLAN

WAYNE STATE
UNIVERSITY

masterplan.wayne.edu

EVOLVE

ENGAGE

RENEW

EVOLVE. ENGAGE. RENEW.

The campus master plan, known as the Wayne Framework, was crafted with great care and in collaboration with a diverse group of students, faculty, staff and community members.

This isn't simply a building renovation; this is a movement to make our campus more welcoming and inclusive for students, faculty, staff and the community. It has been designed to better connect the university and its 13 schools and colleges with the city of Detroit to promote meaningful and continued engagement.

We have embraced this concept of integration with a steward's mentality that will provide the best possible outcome for our environment. By consolidating resources, we can ultimately grow, prosper and explore as we envision the classroom of the future.

The Wayne Framework includes strategies to:

- Organize and improve access of the main campus
- Concentrate academic activity in an enhanced core
- Define key sites for future development

ENVISIONING THE FUTURE.

This is not your typical master plan.

The Wayne Framework is a guide for Wayne State University's physical environment to foster a more centralized and inviting main campus. This adaptable plan offers concrete ideas while also providing the flexibility for the university to make necessary adjustments and modifications over the next decade.

We will continue to evolve, engage and renew for the best campus experience possible.

Goals:

- Develop forward-thinking learning centers
- Strengthen our connection with the Detroit community
- Establish a sustainable and responsible future for the campus
- Support collaboration in academia, research and community outreach
